

As a truck driver I think that xm's Instant Traffic and Weather is a vital informative service for finding weather and traffic conditions in the area I am approaching. Because I need the information now and not after a dozen songs or so. I cannot always access the local station and obtain the information I need within a few minutes.

I do not understand why people in general always want the Government to solve their business problems, when all they have to do is get off of it and provide the service people want.

If XM Radio was not providing their customers with what the customers wanted, the XM Radio company would not stay in business.
